Motorola MTS 2000 Radio CPS Database Motorola R02.00.01. DEPO. : ROCK BOTS [MS.S] - built-in Motorola MTS2000 Technical Support. FULL Motorola MTS2000 CPS R02.00.01 Tuner (RVN4776S) To use the DVB-MTS in your TV "CART" you must download and install the following software.MTS2000 Tuner / Radio.. FALC0S150. Motorola MTS2000 Company Information. 1995-1999. CMS R01.00.01 (dated 10/13/00) . MTS2000 Review; MTS2000 Service Manual; - Page 2.If you were a Star Trek fan back when the original series debuted, you were treated to a lot of new technology in the shows. Most notable would be the Tricorder, a device that automatically produced a variety of information about a patient, including blood type, tissue type, and so on. The device is still used today, but it was originally based on real science, explained in this video. This old video featuring scientist Bob Richards, from the Navy's Office of Naval Research explains how the Tricorder was based on established technology, including several optical techniques to gather data that could potentially be used in a medical setting. In the video, Richards explains that the Navy's O.O.R. spent some time looking into various medical technologies back in the 1950s. Through research, the office identified five key technologies that were promising—and classified as “tentative.” Richards sums it up well: As technology has advanced, we use more sophisticated equipment than what was available at that time, which gives us a better appreciation for these advances today. And even if we are not able to use all of these techniques, they probably will serve their purpose for future generations.

You can see more images and video from the video at the O.N.R.'s website.Let's face it, digital marketing is one of the least used and most expensive areas of marketing. We have a lack of the right people equipped with the right knowledge or simply the lack of the skills that we as a whole now put an expectation on someone to be able to do a job. This is why we have created a community of Digital Marketer's in a quest to learn as much about Digital Marketing as we can
